

GEOFENCING CAPABILITIES OF THE MOBILE PLATE HUNTER-900®

The MPH-900® Geofence creates an invisible, virtual barrier around sensitive areas such as the school shown above. ELSAG's Geofence software integrates with both fixed and mobile MPH-900 cameras.

In a fixed deployment, cameras are mounted on buildings or poles near the area being protected. When the car of a suspect individual, such as a sex offender, crosses the Geofence, an alarm will instantaneously be sent to a police station, patrol vehicle, or the PDA of a specific officer, allowing them to take immediate action.

In a mobile deployment, if a patrol vehicle using the MPH-900 with Geofence software approaches the car of a suspect individual within the protected area an alarm will sound and the officer can interdict.

- Provides real time information that aids in placing suspect at a scene
- Geo-mapping provides exact locations of each license plate captured
- Processes parked or moving vehicles, day or night, in any weather
- Allows officers to be better informed as they conduct regular area patrols
- Backup units can be deployed more efficiently

GET THE MOST ADVANCED AUTOMATIC LICENSE PLATE READER TECHNOLOGY AVAILABLE

The MPH-900® Is Critical To Many Law Enforcement Missions Today

ELSAG North America launched its Automatic License Plate Reader, the Mobile Plate Hunter-900® (MPH-900®), in the U.S. five years ago. It is already deployed in over five hundred agencies across the country. The dependable and accurate information provided by the MPH-900, in addition to ELSAG's 24/7 commitment to customer support have made it the preferred LPR technology in America.

No other system comes close to its ease of deployment, capabilities, and accuracy.

With 70% of all criminal activity in the U.S. involving a vehicle, and with an estimated 40 million license privileges revoked, suspended or denied, the MPH-900's automatic license plate reading capabilities are critical to addressing a variety of missions.

- Highway and traffic safety
- Homeland Security initiatives
- Recovery of stolen vehicles and license plates
- AMBER Alerts and missions related to missing and exploited children
- Safe school initiatives such as perimeter security and school bus safety
- Development and maintenance of Hot Lists
- Drug interdiction
- Gang and racketeering interdiction
- Collection of delinquent taxes, fines, and fees
- Securing restricted areas through access control, monitoring, and enforcement
